# Annual investment performance report

For the period from January 1, 2020 to December 31, 2020

This report shows how your account has performed using a money-weighted rate of return net of charges and taxes where applicable. It can help you assess your progress toward meeting your investment goals.

## Your Canadian dollar account

---

### Change in account value

This table is a summary of the activity in your account. It shows how the value of your account has changed based on the type of activity.

	Past 1 year	Since May 1, 2020
Beginning market value	-	0.00
Deposits and transfers-in	-	69,500.00
Withdrawals and transfers-out	-	-69,500.00
Net investment return	-	0.00
<b>Ending market value at December 31, 2020 (CAD)</b>	-	<b>0.00</b>

## Summary of amount invested compared to market value

*Amount invested is the sum of all deposits and transfers in less withdrawals and transfers out.*

0.00	0.00
(CAD) Amount invested since May 1, 2020	(CAD) Market value as of Dec 31, 2020

## Money-weighted rate of return

<b>Past 1 year</b>	<b>Past 3 years</b>	<b>Past 5 years</b>	<b>Past 10 years</b>	<b>Since May 1, 2020</b>
-	-	-	-	-

### Additional notes:

Returns were calculated net of any charges deducted from this account for advice, transaction and operating charges.

The information in this report is based on trade date and starting in 2020, the market values include accrued income (where available), whereas your custody statement is based on settlement date and accrued interest (where available) only. As such, there may be differences in market value. In addition, the annual report on charges and compensation is reported on a settlement date basis and as a result there may be differences between the total amount of charges used to calculate net returns and the total amount of charges reported in your report on charges and compensation.

Money-weighted rate of return calculation methodology is used to calculate the total percentage return. The total percentage return means the cumulative realized and unrealized capital gains and losses of an investment, plus income from the investment, over a specified period of time, expressed as a percentage, and annualized for periods greater than one year. The method takes into account changes in the value of your investments, dividends and interest you earned, fees that you paid, and the amount and timing of your contributions and withdrawals. This type of calculation is also sometimes referred to as an internal rate of return.

Money-weighted rates of return are only calculated from January 1, 2016 onwards.

In addition to this Annual Investment Performance Report, you may also receive an Annual Charges and Compensation Report. Contact your Investment Advisor / Portfolio Manager, as applicable, for details.
